

Metering Solutions Made Simple

Micro Motion

Micro Motion Meters

Coriolis meters deliver superior accuracy in flow, density, and viscosity measurement in the most critical process applications.

Krohne Meters

World class process instrumentation for flow, pressure, & temperature applications, including coriolis, electromagnetic, ultrasonic, & variable area meters.

ROSEMOUNT

Rosemount Meters

Magnetic Flow Meter Sensors provide long-lasting, reliable performance in even the most challenging applications

Liquid Controls Meters

M-Series positive displacement rotary meters offer precision measurement accuracy for custody transfer of petroleum products, aviation fuels, and a broad range of industrial liquids.

Total Control Systems

Accurately measure liquids with TCS piston, rotary, & oval gear meters. Meters are available in a wide range of sizes and metallurgies.

Red Seal Measurement

Precision-constructed oscillating piston & nutating disc meters used for accurate & repeatable measurement of both petroleum & industrial liquids.

Mixing Solutions Made Simple

Brawn Mixer

Cost competitive engineered mixing solutions that meet the most demanding applications. From portable mixers to large-scale mixing systems.

Milton Roy Mixing

World leaders in mixing technologies. Offering top entry, side-entry, bottom entry, & portable configurations for a wide range of process applications.

Storage Solutions Made Simple
